INTRODUCTION

Professional Summary

Product Design Consultant and Product Engineer with 4+ years of experience designing and building digital products across healthcare, fintech, e-commerce, education, logistics, and AI-driven workflows.

I work across the product lifecycle from understanding user problems and defining product flows to designing interfaces, building functional prototypes, and collaborating with engineers to ship production-ready experiences. My work combines UX research, product strategy, interaction design, design systems, and front-end development.

Experienced in designing complex role-based products, dashboards, healthcare workflows, marketplaces, AI-assisted experiences, and internal business tools. Increasingly focused on bridging the gap between design and engineering by turning product concepts and Figma designs into functional web applications using modern front-end technologies.

CORE COMPETENCIES

Product

Product Strategy | Product Discovery | User Flows | Information Architecture | User Personas | User Journey Mapping | UX Research | Usability Testing | Product Requirements

Design

Product Design | UI/UX Design | Interaction Design | Design Systems | Component Libraries | Wireframing | Prototyping | Responsive Design | Accessibility | Dashboard Design

Engineering
Front-end Development | React | Next.js | TypeScript | JavaScript | HTML | CSS | Supabase | REST APIs | Git & GitHub | Vercel

Collaboration
Design-to-Development Handoff | Agile Collaboration | Developer Collaboration | Design Documentation | Product Problem Solving

TOOLS & TECHNOLOGIES

Design: Figma, Adobe XD, Wix Studio, Framer

Development: Next.js, React, TypeScript, JavaScript, HTML, CSS

Backend / Infrastructure: Supabase, REST APIs, Git, GitHub, Vercel, Netlify

Research & Testing: User Interviews, Usability Testing, Journey Mapping, Heatmaps, A/B Testing

WORK EXPERIENCE

Goalhyke
UI/UX Designer **October 2025 – Present**

- Designed the end-to-end experience for an accountability and habit-building platform, covering onboarding, goal creation, habit tracking, progress verification, reminders, rewards, and accountability workflows.
- Increased onboarding completion by 28**%** through a simplified registration experience and guided goal-setting flow.
- Improved user engagement by 22**%** through redesigned dashboards, habit tracking, reminders, and accountability features.
- Conducted user research and usability testing that contributed to a 35**%** reduction in friction during goal creation and weekly check-ins.
- Designed responsive high-fidelity prototypes and a scalable Figma design system for desktop and mobile experiences.

Block-Scholars Africa – Lagos, Nigeria
UI/UX Designer **March 2025 – July 2026**

- Redesigned the organisation's digital experience, reducing bounce rate by 20% and increasing page views by 15%.
- Improved course sign-ups by 25% through clearer information architecture, onboarding, and call-to-action flows.
- Reorganised navigation and content structure, reducing the time required to reach key resources from 4 clicks to 2.
- Conducted usability testing with students and instructors to validate navigation and content-discovery improvements.

Letsellify Technologies Ltd. – Lagos, Nigeria

Lead UI/UX Designer **March 2024 – June 2026**

- Led end-to-end product design for an e-commerce marketplace connecting buyers, sellers, and supporting logistics workflows.
- Improved onboarding completion by 25% through simplified registration and role-specific user flows.
- Increased user engagement by 15% through personalised dashboards and simplified navigation.
- Restructured the purchase journey from 6 steps to 3, reducing unnecessary friction in the checkout experience.

Lead UI/UX Designer – Logistics (Contract) **Sept 2024 – Nov 2024**

- Designed a multi-role logistics platform supporting vendors, agents, and dispatchers.
- Created role-based dashboards and workflows for order management, tracking, notifications, and fulfilment.
- Improved task completion by 15% through clearer information hierarchy and role-specific workflows.
- Defined interaction patterns adopted across web and mobile interfaces.

SELECT PRODUCT ENGINEERING PROJECTS

Sparkle Eye Specialist Hospital

Product Designer & Product Engineer **September 2026 – Present**

Designed and developed a hospital management platform covering patient registration, clinical workflows, pharmacy, diagnostics, billing, cashier operations, and doctor encounters.

- Designed end-to-end workflows for reception, nursing, doctors, pharmacy, diagnostics, billing, and cashier operations.
- Designed the doctor encounter workflow covering patient history, imaging, slit-lamp examination, refraction, diagnosis, prescriptions, diagnostic orders, and surgery requests.
- Built functional application interfaces using Next.js, React, TypeScript**,** Supabase, and Tailwind CSS**.**

EDUCATION

Federal University of Technology, Akure (FUTA)

Bachelor's Degree — Building Technology
